Municipal contribution

Project drafting, implementation and monitoring.

Municipal sectors/ directorates

The structures that cover economic and social issues in the Municipality.

PROJECT DESCRIPTION

The project is drafted based on the principle of urging young people to create businesses in the field of information technology. This incubator will facilitate the establishment and development of enterprises in the field of technology by assisting them to survive and to grow during their critical initial period. The provision of premises, internet and telephone services as well as legal advice and consultations on how to start up and manage a business will assist in establishing new enterprises and extending the business sector towards information technology. The combination of the energy of young entrepreneurs with the active support and consultation of experienced individuals generates an ideal environment for the new enterprises to foster.

OVERALL OBJECTIVE

To promote youth enterprises in the field of information technology.

PROJECT IMPLEMENTATION MODALITY

This project aims to support young entrepreneurs who operate in the field of information technology by integrating them to entrepreneurial activities thus providing employment opportunities to others. Initially, an asset of the Municipality of Tirana to be transformed into an incubator will be identified. The facility will be reconstructed and serviced with a telephone and internet line. Then a small structure will be established to provide the maintenance of the facilities and to offer legal and tax advice to the enterprises that will be stationed there.

PRELIMINARY IMPACTS

- Youth employment increased;
- Young entrepreneurs involved in the field of technology;
- Technology and innovation promoted;
- The number of enterprises that create an added value increased.
