L03

Budget

EUR 104,000 (ex. VAT)

Municipal contribution

15% of the total figure of the budget existing assets.

Municipal sectors/ directorates

Tirana Parks and Recreation Agency (TPRA)

PROJECT DESCRIPTION

The Grand Park of Tirana is visited by 4,000 - 5,000 visitors / day during weekdays, and double as much during weekends. This project aims to build 4-6 info points / kiosks located at the parks' entrances and within. Built in partnership with private investors, these facilities will provide the following services: points of information; first aid services; security camera system monitoring the parks' entry and exit points; bike stations; newspaper kiosks; wi-fi area; vending machines; souvenirs, gifts and artisan kiosks.

The investment has a potential of offering high returns due to the high number of daily visitors, especially during spring and autumn.

OVERALL OBJECTIVE

Increased comfort and security which would contribute to a better exploitation of the Grand Park of Tirana. Modernization of the Parks' infrastructure and services.

PROJECT IMPLEMENTATION MODALITY

The implementation includes several phases: The construction of the 22m² thermo-isolated facilities requires the use of ecological wood. The construction of 35m² open pergolas and benches with chemical treated wood. The construction of base layers (30m² + 35m²). Monitoring system set up where cameras are located at 6 strategic points. Design of information backlight boards, electric and hydrant installation.

PRELIMINARY IMPACTS

These facilities would increase the quality of services at the Grand Park, creating comfortable and practical conditions as well as offering easy access and orientation to the visitors. This would ideally increase the number of visitors/frequenters in this area.
