

Tirana Eco-Pavilion – TPRA Sustainable Building

about project

L27

Budget

EUR 500,000 (EX. VAT)

Municipal contribution

Tirana Municipality/TPRA will be able to cover about 15% of the total budget in addition to the provision of the land

Municipal sectors/ directorates

Tirana Parks and
Recreation Agency

PROJECT DESCRIPTION

The project aims to build a physical and logistic infrastructure facility for the TPRA and Tirana Municipality. The facility will be ecologically designed, equipped with energy preservation technologies and will accommodate various events. It includes a polyvalent room to accommodate various events for the citizens (exhibitions, public hearings, conferences, cultural and training events) and also auxiliary premises to support the services above (storage facility, administrative office, green recreational space, service rooms etc). The TPRA Administration Offices will be transparent and open to visitors and schools and student interns.

OVERALL OBJECTIVE

Improved spaces and services for businesses and citizens through a multifunctional, innovative and green facility, hosting socio-cultural events and raising public awareness on environmental protection

PROJECT IMPLEMENTATION MODALITY

- Define the land where the project will be implemented (environmental setting, access roads, parking lots etc.)\
- Collect visual information and data (spatial, utilities, existing functions, access to the city, visitor influx)
- Prepare ToRs in compliance with European standards and community needs.
- Coordinate and cooperate with stakeholders (private businesses, environmental associations, universities, central and local government)
- Develop the final project together with the abovementioned partners (prepare narrative documentation, project execution and implementation plan)
- Proceed with tendering, verification and further management of the multifunctional facility.
- Establish the administrative infrastructure to manage the facility
- Training, Information dissemination and Promotion

PRELIMINARY IMPACTS

- ⇒ Increased TPRA performance and efficient operation in relation to the numerous activities that the new building will host
- ⇒ Increased public and developers' awareness in relation to the environment and green technologies
