Budget

EUR 1.500.000

Municipal contribution

Support to build the necessary infrastructure for the implementation of the project

Municipal sectors/ directorates

General Directorate
Nr. 2 , Production and
Maintenance

PROJECT DESCRIPTION

The replacement of the existing asphalt plant owned by the Municipality with a new one, in order to reduce asphalt maintenance costs. Currently, the Municipality purchases most of this product from third parties at a 50 % higher cost compared to its own production.

OVERALL OBJECTIVE

The project aims to increase the quantity and quality of wearing course asphalt production, as well as to reduce production costs by as much as 50%. In addition, it aims to reduce pollution emitted into the atmosphere during the operation process of the plant.

PRELIMINARY IMPACT

The increase of production and the cost reduction by 50% will have a direct impact on the work of the Municipality by allowing it to carry out a significantly greater volume of maintenance work in the city's infrastructure. Pollution levels will also be reduced as a result of the advanced technology that will be adopted.
