## Rehabilitation and installation of central heating in “Mihal Grameno” school

about project

**S16**

### Budget

ALL 63,383,256

### PROJECT DESCRIPTION

The school is in a 3 floor 1136 m2 building over a land plot of 6693 m2. It is in poor conditions due to wear, with a very old electric grid and plumbing system. It lacks central heating and the underground premises are flooded on a regular basis.

The project consists in the reconstruction of the building and equipping it with a central heating system. It will be fitted with a new electric and plumbing system, while other interventions will take place in the gym, toilet facilities and the school yard.

### OVERALL OBJECTIVE

The project will improve the conditions of the school by rehabilitating the existing facilities and through their reorganization thus reducing the problem of overcrowding and eliminating the double shifts in classes.

### PROJECT IMPLEMENTATION MODALITY

The project foresees the following activities:

- Reconstruction and repair of the school building;
- Increase in the school's capacity;
- Creating recreational spaces for attendance not only by school children but also by others as part of community centers;
- Improvement of the technical teaching facilities;
- Increasing the efficiency of energy use, through the installation of the heating system.
